

Microsoft Exchange Email Hosting

Exchange Email Hosting

Introducing a new advanced business email service available through PocketiNet called Microsoft Exchange! At PocketiNet we're constantly striving to better our portfolio of services we offer our customers. Offering a new level of business communication based on leading software from Microsoft is yet another way to make your business more productive and efficient.

Microsoft Exchange is a Full Service Messaging Platform which includes:

- Calendar Sharing and Group Scheduling
- Resource Scheduling
- Contact Sharing
- Task Management
- Enhanced Security
- Encrypted Message Service, HIPAA and Sarbanes Oxley Compliant (option)
- Email Archiving, Backup & Recovery (option)
- MS Sharepoint (option)
- Offline Access
- Public Folders
- Free/Busy Lookup
- Resource Scheduling Management
- Shared Calendaring
- Delegate Access/ Management
- Web Calendar Subscriptions
- Real-time, Wireless Schedule Synchronization Across Multiple Computers and Mobile Devices Create Shared Contacts and Email Distribution Lists
- Synchronize Address Books Across Multiple Computers in Real Time
- Access your Company's Global Address Book from Anywhere, Anytime!

Email Compliance:

- **Compliant Archiving:** Complies with Sarbanes-Oxley, SEC, NASD, and NYSE regulations
- **Message Mirror:** Creates a copy of each email sent and received for staff monitoring
- **Company Disclaimer:** Company disclaimer feature is an effective way to help your customers enforce a company-wide email policy

Advanced Anti-SPAM Protection:

- **Content Filtering:** Protects on the server side against bad headers and suspect attachments.
- **Company-Wide White and Black Lists:** Define in detail which senders should always or never be allowed to email you, both at the mailbox level and across your account at the administrator level.
- **Outlook Integration:** End users can control their personal white and black lists directly from Outlook.
- **Flexibility:** Administrators can manage all spam settings and users get mailbox-level white/black list control.
- **User-Defined Sensitivity:** Customers can refine spam sensitivity levels according to their company's email usage.

There are many more features available in this platform and we are making this available as a paid upgrade to our valued business customers. Prices start at just \$12.95/mo per email box and you can either select individual email accounts to be on Exchange or you can move your whole domain (www.business.com) onto this platform. *Your choice.*
